// Create an array
var answers = List();

// Populate it
for (int i=0; i<100; i++){
    answers.add(42);
}

// Show array items on screen with ListView
ListView.builder(
    itemBuilder: (BuildContext context, int index) {
        return Text(answers[index]);
    },
    itemCount: answers.length,
);

class Rectangle {
    int side1;
    int side2;

    // Accept 2 parameters in constructor and
    // make sure they are not null
    Rectangle(this.side1, this.side2) :
        assert(side1 != null),
        assert(side2 != null);
}

// Useful shortcuts
// stless -> Create Stateless Widget
// CTRL + B -> Jump to class definition
// ALT + ENTER -> Show the *magic* dialog
```
